www.brighthubdigital.com.. Browse through our recommendations of the best DSLR and mirrorless cameras of 2016 and decide which ones are best for your needs and pocket. Get it now. Sony A7R II. The Sony A7R II is the full frame camera of choice when you're looking for the best camera for video. It produces amazingly low light images that capture details that other full frame cameras just can't do. The A7R II also produces some of the highest quality videos thanks to its burst mode, slow shutter speeds and a comfortable and robust build. The A7R II is a well-rounded camera that is well equipped with a number of improvements over the first generation A7. It features a newly developed image processing engine that makes it even better at low light imaging. That means that when you are taking shots in low light environments, the camera captures more detail and gives you a higher-quality image. You'll also be pleased by the new control dial that is more responsive than the previous version. It also has a wider range of control dial settings, the back and front dials on the camera are larger and more comfortable to use. We also liked the smaller, full frame Sony sensor with its high sensitivity and the Sony E-Mount, which is compatible with most existing Sony lenses. If you are looking for the best camera for video, the A7R II is the way to go. Its video features include: 1) It is the best camera for making great video because it produces the lowest noise images of any of the full frame cameras. The E-mount lenses are very forgiving so you won't have to worry about that, but Sony offers some of the best video stabilizers on the market, so you can pick your favorite, just make sure it can attach to the mount. You can also use your own stabilization system in post processing. 2) It's the fastest full frame camera for video recording, and it has a high frame rate of up to 200fps, for cinematic-looking images. 3) It's got an extremely high resolution of 7680 x 4608, which is double the resolution of the A7. It's good for high definition 4K video and you can also set the camera to UHD 4K for even better quality. 4) It has an ability to switch automatically between portrait and landscape modes on the 82157476af
